PROJECTS

- **SKIN LESION CLASSIFICATION USING CNN**
 - Developed and trained a Convolutional Neural Network (CNN) for skin lesion classification using the HAM10000 dataset.
 - Applied data preprocessing and augmentation techniques to improve model performance.
 - Fine-tuned the model achieved 72% accuracy in disease detection.
 - Showcased expertise in deep learning, medical image analysis, and computer vision.
- **IMAGE FORGERY DETECTION USING CNN & MOBILENETV2**
 - Implemented and fine-tuned CNN and MobileNetV2 for authentic vs forged image classification.
 - Processed the CASIA 2.0 dataset with preprocessing and augmentation to improve model performance.
 - Achieved ~61% validation accuracy in image forgery detection.
 - We gained experience in deep learning, transfer learning, and computer vision.
- **VAULTAI – SECURE IN-HOUSE AI ASSISTANT (ONGOING)**
 - Developing an offline-first AI assistant for secure document handling and analysis.
 - Implements PDF to Excel conversion, document summarization, and querying internal documents.

- Ensures data privacy and security with no external data exposure.
- Gaining hands-on experience in AI application development, NLP, and secure system design.

CO-CURRICULAR/EXTRA CURRICULAR ACTIVITIES

- **Online courses and certification**

- Certified on the topic C programming – Udemy
- Python for Data Science – Udemy
- Analysis and Design of Algorithms – Udemy
- Data Structures and Applications – College
- Full Stack Development -Infosys Springboard

- **Hackathon**

- Design Thinking Hackathon (2025)

- **Seminar**

- Attended a career preparation seminar focused on aligning skills and strategies for success in Ellucian.
- Agile and DevOps as a career workshop held by Mr. Ananta Basudev Laha.
- Workshop regarding “The AI Revolution: How AI is Transforming Business and Product Innovation” led by Mr. Sarthak Mangalmurti.
